## Summary

Recent Master's graduate in Cybersecurity with a background spanning security engineering, detection, and software development across professional and project work. Spent a year as a Junior Software Developer building secure web applications for an agency serving regulated banking and telecom clients, and shipped security-focused projects including an AI-assisted alert triage engine, an open-source vulnerability fix, and a Suricata detection pipeline mapped to MITRE ATT&CK. Comfortable working end to end across detection engineering, incident response, cloud security (AWS), and full-stack development, with a focus on building reliable, secure, and well-documented systems.

## Education

### Purdue University

*Master of Science in Cybersecurity & Trusted Systems (GPA: 3.97)*

West Lafayette, IN

Aug. 2024 – May 2026

### Thadomal Shahani Engineering College

*Bachelor of Engineering in Computer Engineering (GPA: 3.44)*

Mumbai, India

Aug. 2020 – May 2024

## Professional Experience

### Junior Software Developer

July 2023 – June 2024

*Thoughtcom India*

Mumbai, India

- Built and maintained responsive websites using HTML5, CSS3, JavaScript, and jQuery for an agency serving regulated banking and telecom clients, delivering clean, cross-browser-compatible interfaces.
- Implemented client-side form validation and input sanitization and configured HTTPS/TLS, strengthening data handling and security posture for sites holding sensitive client information.
- Wrote Python automation for repetitive build and content tasks, reducing manual effort and improving turnaround consistency by 30% across recurring deliverables.
- Maintained dependency and CMS hygiene through routine updates and access-control reviews, communicating fixes clearly to technical and non-technical stakeholders.

### Network Engineer Intern

May 2023 – Jul. 2023

*Jerai Fitness Pvt Ltd*

Mumbai, India

- Debugged 20+ full-stack connectivity and configuration issues, owning problems from report to resolution and cutting resolution time by 25%.
- Scripted Python and Bash automation for log parsing and validation, building repeatable internal tooling that improved triage speed.

## Projects

### AI-Assisted Alert Triage Engine | *Python, FastAPI, LLMs, Postgres, Docker*

- Built a full-stack triage engine with a model-agnostic LLM interface (Claude, Ollama), forced tool-calling for structured outputs, MITRE ATT&CK enrichment, and an evaluation harness that catches fabricated data.

### LineJump – Open-Source Security Contribution | *TypeScript, Node.js*

- Identified and patched a multi-bypass SSRF vulnerability in an open-source scanner using IP-allowlist resolution and connection pinning, contributing the fix upstream with 28 regression tests.

### Cloud-Native Threat Detection Pipeline | *Suricata, Docker, Python, Elastic*

- Deployed a Suricata IDS in Docker with 50+ rules mapped to MITRE ATT&CK and a Python pipeline parsing EVE JSON logs into Kibana dashboards for detection and triage.

### Data Breach Compliance Tracker | *Flask, AWS (EC2, RDS, S3), IAM*

- Built a full-stack web application on AWS with least-privilege IAM and audit logging, tracking breach notification deadlines across GDPR, HIPAA, PCI-DSS, and CCPA frameworks.

## Technical Skills

**Security & Detection:** Splunk, Suricata, Wireshark, tcpdump, IDS/IPS, Nessus, Burp Suite, Nmap, MITRE ATT&CK, OWASP Top 10

**Security Concepts:** Detection Engineering, Incident Response, Threat Hunting, Vulnerability Management, DevSecOps

**Languages & Development:** Python, JavaScript, TypeScript, SQL, Bash, HTML5, CSS3, React, Flask, APIs

**Cloud, AI & Tools:** AWS (EC2, RDS, S3, IAM), Docker, Git, GitHub, LLM APIs (Claude, Ollama), PostgreSQL, Elastic

## Certifications & Coursework

**Certifications:** CompTIA Security+, Certified Information Security & Ethical Hacker (CISEH), Practical AI Pentest Associate (PAPA)

**Coursework:** Database Security, Network Security, Cloud Infrastructure, Cloud Security & Privacy, Wireless Security, Information Risk Management, Mobile & Network Forensics
