Certifications: CompTIA Security+ | Certified Information Security & Ethical Hacker (CISEH) | AWS CCP

EDUCATION

Purdue University

Master of Science in Cybersecurity & Trusted Systems (GPA: 3.9)

West Lafayette, IN

Aug 2024 – May 2026

Thadomal Shahani Engineering College

Bachelor of Engineering in Computer Engineering (GPA: 3.4)

Mumbai, India

Aug 2020 – May 2024

EXPERIENCE

Information Technology Analyst

Thoughtcom India

Jan 2024 – May 2024

Mumbai, India

- Performed multi-source log analysis by developing Python and API pipelines, correlating anomalies across telemetry sources to support triage, investigation, and root cause analysis of suspicious activity.
- Translated complex telemetry into clear investigation notes and metrics reports, communicating findings to lead reviewers and improving turnaround consistency by 30% through structured tracking and proactive updates.
- Identified process improvement opportunities in the existing reporting workflow, proposing pipeline changes that strengthened detection visibility and reduced false positive review effort.

Network Engineer Intern

Jerai Fitness Pvt Ltd

Aug 2023 – Nov 2023

Mumbai, India

- Supported incident response for 20+ LAN and VPN security events over 3 months by analyzing logs and Wireshark captures, correlating endpoint signals to detect, triage, and contain real time network anomalies.
- Applied TCP/IP, HTTP/HTTPS, DNS, and TLS knowledge for protocol analysis across 5+ segments, distinguishing misconfiguration from suspicious activity and cutting resolution time by 25%.
- Documented incident timelines and root cause findings to build repeatable response runbooks.

PROJECTS

NetSentry: Web Scraper Honeypot

- Designed and deployed a Flask based honeypot to capture and analyze malicious automation traffic in real time, logging detailed request metadata across trap endpoints to support detection engineering and adversary behavior profiling.
- Implemented real time countermeasures including CAPTCHA, rate limiting, and IP blocking, reducing automated scraping success by 45% and documenting tuning decisions to maintain a hardened security posture.
- Configured an SMTP based alerting pipeline to notify on high confidence bot detections, reflecting the kind of detection rule tuning and automated response workflow used in modern SOC environments.

Splunk Incident Investigation (Log Correlation and Reporting)

- Built Splunk SPL searches and correlation logic across multiple log sources to uncover a multi stage insider threat, tracing attacker behavior from credential misuse to unauthorized data transfer across 76,000 ingested events.
- Documented investigation findings, response actions, and lessons learned in a structured incident report covering timeline, impact, and remediation recommendations.
- Designed a Splunk dashboard with event timelines and user activity to improve telemetry and reduce dwell time.

Data Breach Compliance Tracker

- Built a full stack web application using HTML, CSS, JavaScript, and Flask, hosted on AWS (EC2, RDS, S3) to track regulatory breach notification deadlines across GDPR, HIPAA, PCI-DSS, and CCPA frameworks.
- Enforced least privilege IAM policies and VPC security group controls across all cloud resources, applying access reviews and configuration hardening to reduce the overall attack surface.

TECHNICAL SKILLS

Security Tools & Monitoring: Splunk, SOAR, EDR, Wireshark, tcpdump, Nessus, Burp Suite, IDS/IPS

Networking & Protocols: TCP/IP, HTTP/HTTPS, DNS, TLS, VPN, curl, dig, nslookup, Microsoft Active Directory

Scripting & Cloud: Python, Bash, JavaScript, REST APIs, AWS, GCP, Microsoft 365, Docker

Operating Systems & Compliance: Windows, Linux (Kali, Ubuntu), macOS, MITRE ATT&CK, OWASP Top 10, CIS, HIPAA, PCI-DSS, GRC
